

Singapore - Pilot Run for Health Supplement Submissions

Currently there is no pre-market notification or registration requirement for health supplements in Singapore. Now, the Singapore Health Sciences Authority (HSA) has started reviewing the local Traditional Medicines and Health Supplements regulations, in conjunction with the ongoing ASEAN Traditional Medicines and Health Supplements Regulatory Framework and its technical requirements which is scheduled for implementation in all the 10 ASEAN Member States by 2015.

Members of the Health Supplement Industry Association Singapore (HSIAS) have been invited by HSA to participate in a pilot run of product submissions to assess the industry's capacity in meeting technical requirements as well as to test the functionality of HSA's online submission system.
