

GLOBAL COLLAGEN MARKET usd 7.6BIL 2027

SPECIFIC COLLAGEN BOOSTER

Collagen IV and VII – structural collagen in the dermal epidermal junction of the skin

Collagen I, III – “content” collagens making up bulk of the dermis, epidermis.

+ DERMAL EPIDERMAL JUNCTION
The DEJ thins with age, making the skin more prone to sagging

+ COLLAGEN
As collagen degrades, the skin's underlying support structure weakens and wrinkling occurs

+ ELASTIN
As elastin breaks down over time, skin loses its firmness

BOOSTS FOLLICLE ANCHORING

ex-vivo study shows stronger anchoring of the follicle into the skin, reducing hair fall and improving hair health

Collagen IV (purple) before Keratin

Increased Collagen IV (purple) after Keratin

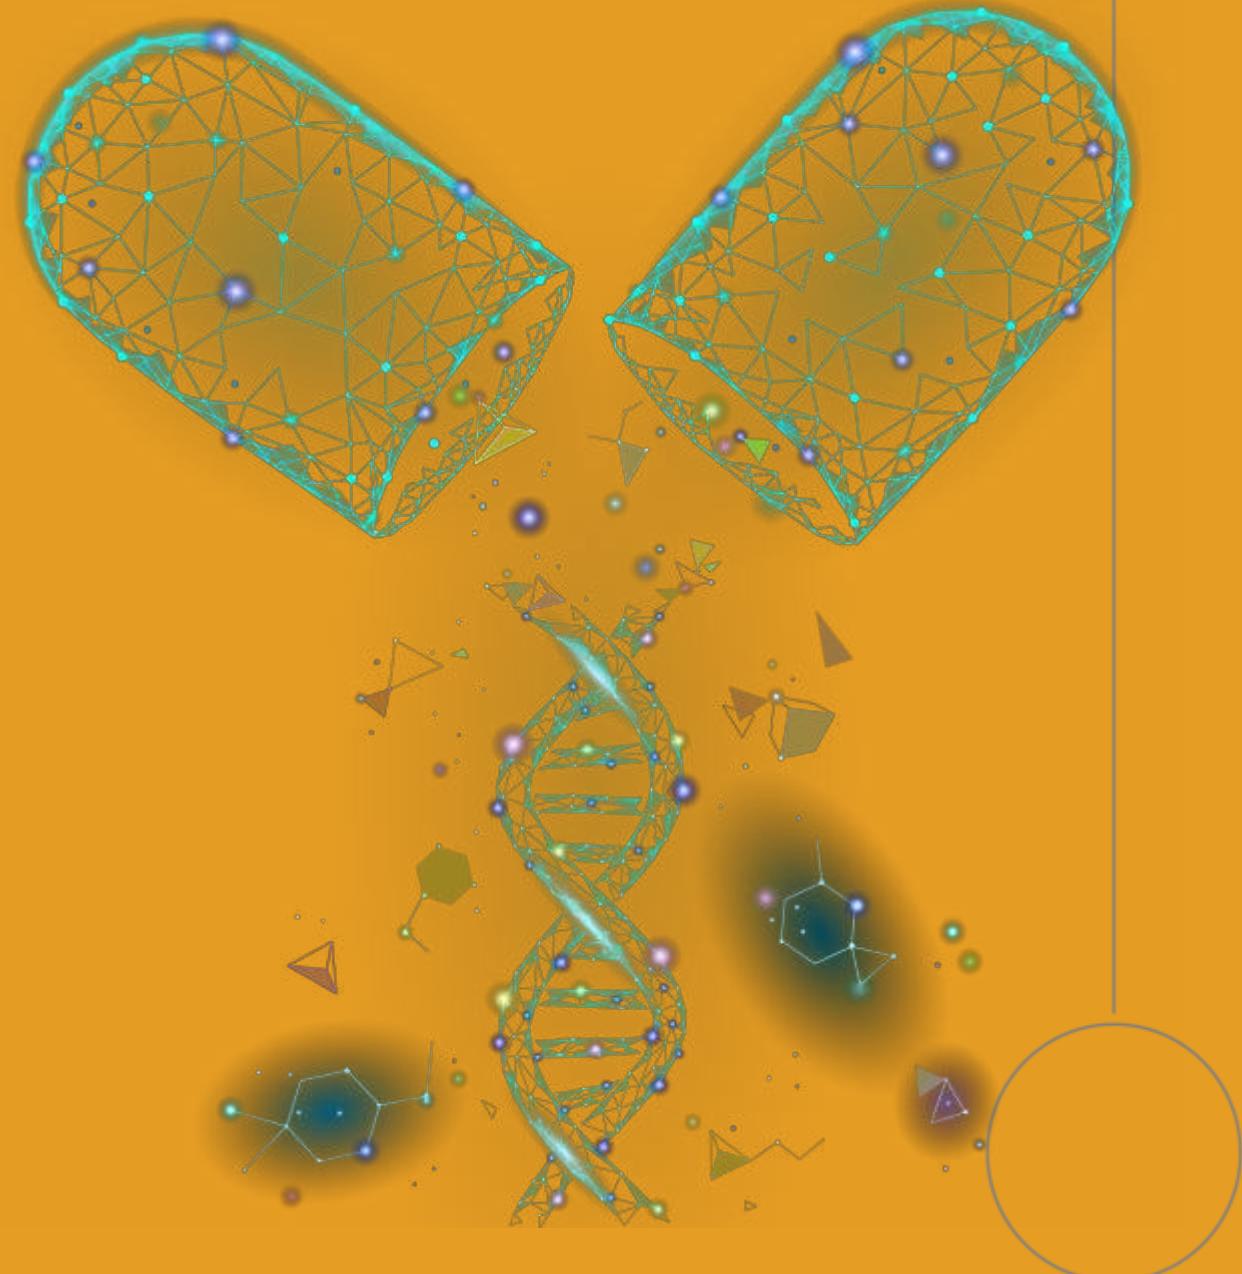

KERAGEN-IV™ promotes

Wrinkle reduction by building
the dermal epidermal junction.

Stronger hair follicles by promoting
anchoring of follicles in the scalp.

Healthy nail growth by providing the
right amino acid balance.
